Remote Medication Review

Expand the reach of your community pharmacy.

DO YOU CONDUCT MEDICATION REVIEWS OUTSIDE YOUR PHARMACY?

IF NOT, WHAT'S STOPPING YOU?

The provision of medication reviews outside the pharmacy is an opportunity that many owners have been tentative about exploring. As a heavily paper-based process, the overwhelming amount of time and effort to conduct a review has been daunting.

The result? A revenue stream that has been largely ignored.

UNTIL NOW!

PTS has leveraged the power of the McKesson network to make our mobile Medication Review module truly mobile!

Paired with the Patient Centre app, the McKesson network opens a secure remote access connection to your pharmacy. Whether you are conducting medication reviews at care facilities, private residences, or elsewhere, you will be able to document the encounter in Patient Centre as if you were in the pharmacy.

With the tools to conduct remote medication reviews, you can expand your scope of services to create better patient health outcomes within the community, while maximizing your revenue stream.

PTS is the only vendor in Canada equipped to offer a secure Remote Medication Review to independent pharmacy.

YOUR REMOTE MEDICATION REVIEW TOOLKIT:

- PharmaClik Rx Medication Review subscription
- Remote Medication Review subscription
- iPad or laptop configured with Patient Centre
- HP OfficeJet 200 Mobile Printer

FEATURES

- **Reach more patients.** Use an iPad or laptop to conduct medication reviews outside the pharmacy: visit patients who have difficulty travelling to a community pharmacy, or who live in care facilities.
- **Stay connected.** Use a Wi-Fi or Hotspot connection to connect the iPad/laptop and mobile printer to the internet.
- **Protect patient data.** Patient health information is protected through a secure network connection to your pharmacy, and no data resides on the devices.
- **Go paperless.** Use Patient Centre to capture all information, including digital signatures, while conducting the medication review. The completed forms are stored in a digital format for record keeping.
- **Provide the Best Possible Medication History.** Provide your patient with a completed copy of the medication review using a mobile printer. Comprehensive information is provided on provincially supported forms, including colour drug pictures of the patient's medication where permitted by the province.

BENEFITS

GROWTH

- Increase revenue opportunities
- Offer an expanded scope of services
- Gain efficiencies

SECURITY

- Protect patient health information
- Protect your pharmacists while they are in the community
- Protect your pharmacy

COMMUNITY

- Improve patient outcomes
- Create goodwill in the community
