

# Retail Learning Academy

Learning anytime, anywhere

In a world full of changes, the one thing we can all agree on is that time is at a premium.

**Getting back more time in the pharmacy is a key to success.**

The Retail Learning Academy is Pharmacy Technology Solutions' in-house online learning platform offering courses and recorded webinars for our various products and services. Online learning (eLearning) provides a convenient way to access learning where you want and when you want.

- **Quick** onboarding of new team members
- **Continuous** learning for all team members
- **Reporting** on learning progress
- **Recognition** for course completion

New hires can take the learning before even stepping into the pharmacy. Existing team members can continuously increase their knowledge by taking more advanced courses as they grow into their roles.

Using the Retail Learning Academy eLearning courses leads to increased employee retention and reduces time and labour often associated with scheduling and delivering training. This time saved can be used to focus on customers.

Save time and become an expert with quick and convenient Propel Rx and Propel POS eLearning on the Retail Learning Academy.

**LET'S GET YOU TRAINED!**
