

**Pharmacy Technology Solutions**

**POS ONE**

An advanced and affordable solution for smaller stores

**Complete Retail Management System**  
Manage your business effectively.

**POS ONE** is a Point-Of-Sale system in a box. For \$5000 it provides all the functionality you need to launch your pharmacy with POS. Its advanced hardware and software solutions will help you to increase profitability, integrate with PharmaClik Rx, improve inventory management, efficiently manage pricing, and effectively analyze your business using advanced reporting.

**POS ONE** was designed for pharmacies that have a smaller front store but still want the benefits of a market-leading pharmacy POS system. It provides everything needed to get started, with options to expand as your pharmacy grows.

**Affordability and Flexibility**

PharmaClik POS ONE offers a high functioning, cost effective solution for the smaller stores. Our bundled solution is shipped with software and product files pre-loaded. POS ONE is designed for simple self-installation and self-training; it comes with everything needed to ensure implementation is easy and efficient. However, if preferred, technician installation and customizable training packages are also available.
