Biometric Security

SECURITY AT YOUR FINGERTIPS!

With a focus on security, and a multitude of user IDs and passwords being the norm these days, PTS can help you easily manage security credentials for pharmacy and front shop employees.

Integrated with PharmaClik Rx and PharmaClik POS, the U.are.U 4500 Reader is a biometric fingerprint reader that improves operational efficiency in both the dispensary and the front shop. Built for multiple users in a shared environment, this rugged fingerprint reader is an ideal solution for busy pharmacies.

BEST PRACTICE TIP!

Protect your pharmacy's sensitive sales and patient information.

With a quick and easy method of securely logging into the pharmacy's key business systems, installing fingerprint readers is the perfect opportunity to introduce security best practices to your employees.

FEATURES

- **Reduces** the complexity of logging into PharmaClik Rx and PharmaClik POS.
- **Eliminates** the need to remember passwords, and prevents employees from being locked out their accounts as a result of forgotten passwords.
- **Protects** employees from exposing their password during the login process when customers or other employees are present.
- **Verifies** that you are who you say you are, using a secure method of user authentication.
- **Improves** the clerk's experience when logging into the till application.
- **Enables** better user accountability within PharmaClik Rx; the seamless login allows users to quickly login when accessing a workstation, ensuring actions performed in the software are associated with the accurate user.
- **Complies** with NAPRA standards and meets Drug Information System requirements in applicable provinces.

HOW MANY FINGERPRINT SCANNERS DO I NEED FOR MY PHARMACY?

The ideal number of fingerprint scanners varies from store to store. Scanners are workstation-specific and the number of workstations varies by store. When purchasing fingerprint scanners, consider the following:

- 1. How many Rx workstations and POS tills do you have?**
- 2. How many of those are actively used each day?**
- 3. How many of those workstations are shared or are accessed by multiple employees?**

At minimum, we recommend a fingerprint scanner for each POS till and every high-activity dispensary workstation.

BENEFITS

U.ARE.U 4500 READER

- Uses optical fingerprint scanning technology for superior image quality and reliability
- Accurately and rapidly recognizes even the most difficult fingerprints, regardless of placement angle
- Durable metal casing resists unintentional movement
- Small, compact design:
L 65mm x W 36mm x H 15.56mm
- USB connection

PHARMACLIK RX

- Easy setup in Security
- Automatic login to PharmaClik Rx, Reports and Security without the need to enter user initials
- Optional login with password

PHARMACLIK POS

- Easy setup in Employee Editor
- Supports easy implementation of the auto-logout function on the till
- Supports fingerprint only or 'fingerprint or password' login features in conjunction with a user code
- Eliminates entering password when logging into the till or menu

“We have been using fingerprint technology for many years on our dispensary POS system. It allows multiple staff members to share one till and cash drawer while ensuring accuracy and accountability. Now that we have biometrics available on PharmaClik Rx, I have the same confidence in operational efficiency and accountability in the pharmacy. The pharmacy team really appreciates the simplicity without having to manage complicated password requirements.”
