

INNOVATIVE SOFTWARE

Propel POS

Retail management made easy.

Propel POS is a complete Retail Management System that allows you to effectively manage your business.

Through a modular approach, Propel POS adapts to your retail environment rather than you adapting to it.

Start with the “Basic” module that includes Accounts Receivable, Label Program and Purchasing & Receiving to help manage most aspects of your front shop.

Modules are available to build and expand your system’s features and tailor it to your business needs. As your expertise grows, POS functionality can expand to meet your needs.

BENEFITS:

- **Control retail prices** and margins, including the ability to maintain standardized pricing within product lines.
- **Reduce labour costs** by implementing streamlined procedures for ordering, receiving and promotions.
- Visibility into product movement and sales history provides the necessary data for **making informed business decisions**.
- **Drive customer retention** by maintaining customer charge accounts and implementing loyalty programs.
- **Implement standard operating procedures** to improve staff compliance and reduce human errors.
- **Protect your business** by restricting employee access to sensitive sales data.

FEATURES:

- Manage **customer relationships** and encourage repeat business through customer loyalty and accounts receivable programs.
- Update inventory, costs and prices through **purchasing and receiving**; create orders based on minimum and maximum re-order levels.
- **Replenish** inventory sold at the till during a date range, or forecast inventory needs based on historical movement.
- **Value inventory** using the first-in-first-out method, as well as a variety of other sophisticated stock control features.
- Create professional **in-store signage**, price labels and shelf talkers.
- Process transactions directly from the till using integrated **credit debit**.
- Update and verify POS data remotely using **hand-held wireless devices**.
