

Effective January 15, 2018, the Ministry of Health's PharmaCare program will provide British Columbia (BC) residents with a valid prescription the Mifegymiso® (mifepristone and misoprostol) at no charge through BC pharmacies.

PIN	Product	Effective Date
66128174	mifepristone-misoprostol (Mifegymiso®)	January 15, 2018

The BC Centre for Disease Control (BCCDC) will manage and distribute Mifegymiso for BC and will provide it at no cost to pharmacies. For more information, [click here](#).

## How do I dispense Mifegymiso?

To dispense the Mifegymiso you will need to first perform a Drug Utilization Inquiry (TDU) transaction and then proceed to billing. Follow the steps as outlined below:

To perform a TDU transaction in PharmaClik Rx:

1. Select the **Patient** button. The Patient Search window opens.
2. Search for and select the patient. Click **OK**.
3. Select the **Profile** tab.
4. Select **Rx > Interactions**. The PharmaNet Drug Interaction window opens.
5. Select the **Add** button. The Drug and Mixture Search window opens.
6. Search for and select the DIN. Select **OK**.
7. In the PharmaNet Drug Interaction window, select the **Check** button. *Result:* PharmaClik Rx will call out to PharrmaNet to perform a TDU.

To bill for Mifegymiso in PharmaClik Rx:

1. [Create a new prescription](#) for the patient using the publically funded immunization PIN 6612874.
2. In the **Doctor** field, specify the Pharmacist administering the injection.
3. Enter **1** in the QA, Qty and DS fields.
4. In the **SIG** field, indicate that the claim is for an Immunization.
5. Ensure the prescription's billing code is **PC/CA**.
6. In the **Rx Detail** tab, select the **Cost** magnifying glass. The Requested Cost & Fee window opens.
7. On the Requested Cost & Fee window, select the **Fee for Service** checkbox.
8. Ensure all amounts are set to \$0.00.
9. Select the **Fill** or **Queue** button to fill the prescription.
