Bill Codes

Assure, Green Shield and ESI
- These drug plans have alternative bill codes AY, G1 and EY
- An alternative bill code is used to distinguish between a cardholder and anyone other then the cardholder, for example a spouse card
- Another reason to use it is for smart cards to distinguish between the cardholder or spouse drug plan and the smart card

Bill Code	Third Party Name	Plan Name	
EP	ESI Canada	General	
EY	ESI Canada	Alternate	

AR Account Receivable
- There are many AR bill codes, XA-X0 and X0-X9, the general one is **AR**
- Attaching a AR bill code to a patient's record will allow prescription amounts to be transferred to their charge account in the PharmaClik POS system
- Bill code Plan Names can be customized in List Maintenance under Accounts Receivable Preferences
