

Cost Method - Atlantic (NB, NFLD, NS, PEI) - Eligibility

Nova Scotia

- Province Plan – MSI Pharmacare
- MRP (Maximum Reimbursable Price) is the maximum reimbursable price applied to drugs which have Pharmacare benefits and have been deemed interchangeable
- The Pharmacare Programs pay the actual acquisition cost (AAC) or manufacturer's list price (MLP) for drugs submitted to the Pharmacare Programs, unless the drug has been assigned a Maximum Reimbursable Price (MRP) or a Pharmacare Reimbursement Price (PRP). The Pharmacare Programs also pay a markup on the cost plus a professional fee.
- Both are updated by PTS in the **Prov \$** field

Newfoundland and Labrador- NIDPF

- Provincial Plan- NLPDP (Newfoundland and Labrador Prescription Drug Program)
- eHealth active province
- NLPDP Drug Products Formulary is updated by PTS in the **Prov \$** field

Prince Edward Island

- Provincial Plan- PEI Health or PhIP
- eHealth active province uses NeCST (National Electronic Claims Standards), an electronic exchange of health data for claim adjudication
- MAC (Maximum Allowable Cost) is updated by PTS in the **Prov \$** field

New Brunswick

- Provincial Plan- NBPDP (New Brunswick Prescription Drug Program)
- MAP (Max Allowable Price) updated by PTS in the **Prov \$** field
- Have an interchangeable custom class that indicates the drugs in the NBPDP Formulary that are deemed Generic and interchangeable to allow for a pricing rule
